

Exercise 1:

The screenshot shows a Windows Forms application window titled "Form1". Inside the window, there is a label "Enter Number:" followed by a text box containing the number "30". Below the text box, the text "Even number" is displayed. At the bottom center, there is a button labeled "Check Number".

```
1 namespace IfSampleDemo
2 {
3     3 references
4     public partial class Form1 : Form
5     {
6         1 reference
7         public Form1()
8         {
9             InitializeComponent();
10
11         1 reference
12         private void btnCheck_Click(object sender, EventArgs e)
13         {
14             int number = Convert.ToInt32(txtNumber.Text);
15
16             if (number % 2 == 0)
17             {
18                 lblResult.Text = "Even number";
19             }
20             else
21             {
22                 lblResult.Text = "Odd number";
23             }
24         }
25     }
26 }
```

Exercise 2:

Form1

Enter Number: 20

Positive number

Check Number

```
nsampleDemo
1 namespace IfSampleDemo
2 {
3     3 references
4     public partial class Form1 : Form
5     {
6         1 reference
7         public Form1()
8         {
9             InitializeComponent();
10
11         1 reference
12         private void btnCheck_Click(object sender, EventArgs e)
13         {
14             int number = Convert.ToInt32(txtNumber.Text);
15
16             if (number >= 0)
17             {
18                 lblResult.Text = "Positive number";
19             }
20             else
21             {
22                 lblResult.Text = "Negative number";
23             }
24         }
25     }
26 }
```
